

EquusLINK

1. To begin writing your EIA (coggins) certificate, click on EquusLINK. This will take you directly to the create page (shown below). The first step is to select your owner. If you have already entered the owner as a contact, click into the box below the Owner header and begin typing to search for them by name. If you are adding a new owner, click the Add New button and enter information into all of the red outlined fields to create the owner. If stable/origin of the horse is a different location than the owner's address, you can uncheck the Same as Owner box to enter that address. If it is the same as the owner's address, leave the box checked.

The screenshot shows the GlobalVetLINK EquusLINK interface. On the left is a navigation menu with options: Create, Batch Create, List, GoPass, and Void. Below the menu are icons for HealthLINK, FeedLINK, ScriptLINK, EquusLINK, and Manager. The main content area is divided into several sections: 'Owner' with a search box and an 'Add New' button; 'Stable / Origin' with a 'Same as Owner' checkbox; 'Horse' with a search box and 'List' and 'Add New' buttons; 'Lab Test' with fields for Lab (Marshfield Labs), Lab Account Number, Test Name (Equine Infectious Anemia (EIA)), Test Type (radio buttons for AGID and ELISA), Blood Drawn Date, Sent Date, Remarks, and Reason (Annual); and 'Rabies Vaccination (Optional)' with Product and Type dropdown menus. A 'Create Test' button is at the bottom right of the Lab Test section.

2. The next step is to add the horse. If the horse is already in the system, click on the List button to the left of the Add New button to load the horses that are linked with your selected owner. If you are adding a horse not yet in the system, click the Add New button, enter information into all of the red outlined fields and click the Create button when done.

This is a close-up of the 'Horse' section from the screenshot above. It features a search input field with the placeholder text 'find by name or ID...', a 'List' button, and an 'Add New' button.

3. Next, create the lab test. Select your lab from the drop-down menu and enter your Lab Account Number, if your lab requires one. Select your Test Type and enter your Blood Drawn and Sent Dates by clicking into the boxes and selecting the dates from the calendar. Lastly, select your Reason for testing and click Create Test.

Lab Test

| | |
|--------------------|--|
| Lab | Marshfield Labs |
| Lab Account Number | |
| Test Name | Equine Infectious Anemia (EIA) |
| Test Type | <input type="radio"/> AGID <input type="radio"/> ELISA |
| Blood Drawn Date | |
| Sent Date | |
| Remarks | |
| Reason | Annual |

Create Test

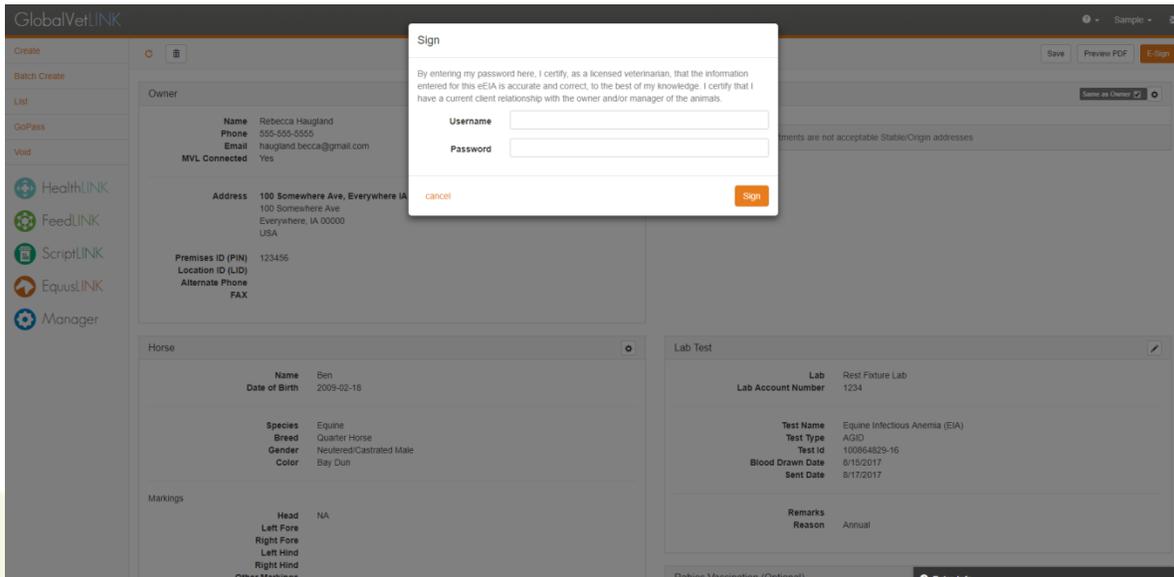

4. The rabies vaccination is optional but can be added to the certificate if you choose. Select the Product and Vaccination Date, enter who the vaccination was Administered By, and click Create Vaccination.

Rabies Vaccination (Optional)

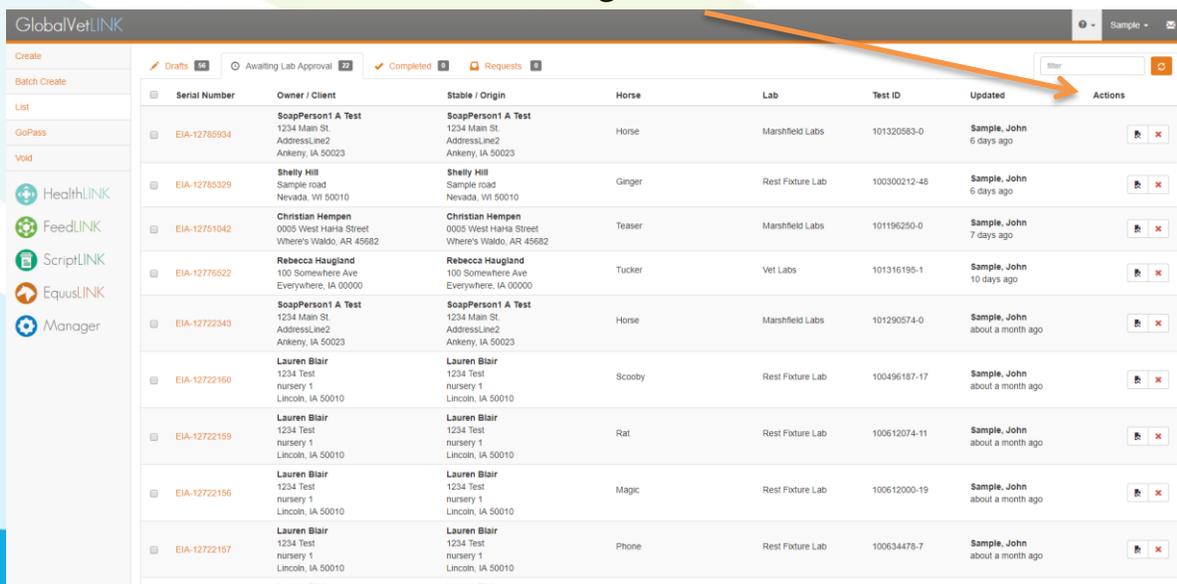

| | |
|------------------|-----------|
| Product | choose... |
| Type | Primary |
| Serial Number | |
| Vaccination Date | |
| Expiration Date | |
| Administered By | |

Create Vaccination

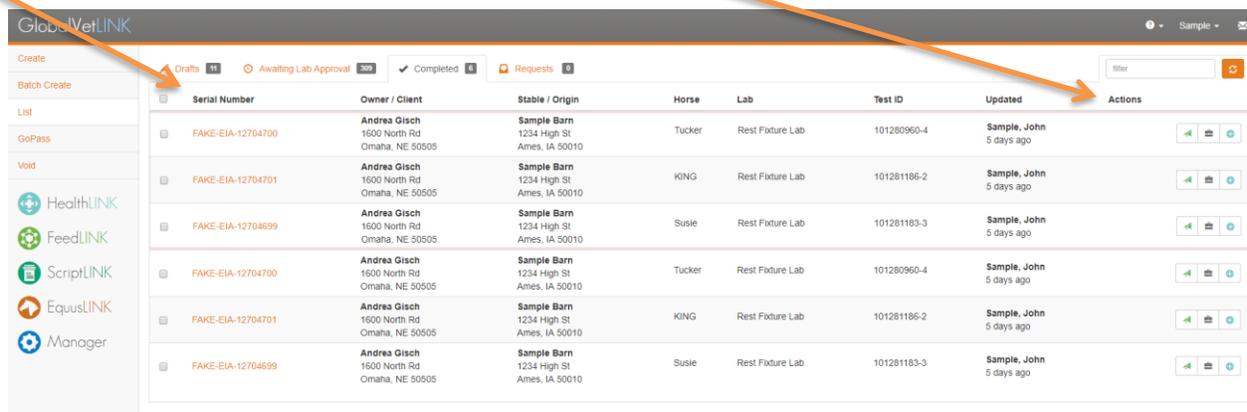

5. You are now ready to e-sign your certificate. We suggest Saving and Previewing the certificate before you e-sign, to verify that the information is correct. Once a certificate is signed, it cannot be edited. After you have verified that the information is correct, click the E-sign button, enter your username and password, and click Sign.

6. After the signing process is complete, the Lab Submittal Form will automatically download. This is the form that is to be sent with the blood sample to the lab. It provides the lab with the necessary information for resulting the test. The Lab Submittal Forms can be also be downloaded from the Awaiting Lab Approval tab in the List view, under the actions on the right-hand side.

7. Once you have e-signed the certificate, it is automatically sent to the lab. When the test is resulted by the lab, you can access it from the List on the left-hand side of your screen. Click on the Completed tab to view the completed tests. You can view and print the certificates by clicking on the Serial Number on the left-hand side, as well as Email, Archive, and Create CVI from the Actions on the right-hand side of the screen.

| Serial Number | Owner / Client | Stable / Origin | Horse | Lab | Test ID | Updated | Actions |
