

# Adding **GVL Connect** as an Extension to Mozilla Firefox

## How do I find and install add-ons/extensions?

Here is an overview to get you started:

1. Firefox may offer personalized recommendations. Click the menu button, click **Add-ons and themes**, and select **Recommendations**.
2. To install a recommended add-on, click the blue **+ Install Theme** or **+ Add to Firefox** button, depending on the type of add-on.

At the bottom of the list of recommended add-ons, there's also a **Find more add-ons** button you can click. It will take you to [addons.mozilla.org](https://addons.mozilla.org) where you can search for specific add-ons.

## Viewing and managing your installed add-ons/extensions:

Search engines can be viewed and managed in the Search panel in Firefox Settings. For other add-ons:

1. Click the menu button and choose **Add-ons and themes**. The **Add-ons Manager** tab will open.
2. Select the panel for the type of add-on you wish to view or manage, such as the **Extensions** or **Themes** panel.

For detailed information on disabling or removing add-ons, see [Disable or remove Add-ons](#).
