

Adding **GVL Connect** as an Extension to Google Chrome

Note - You can't add extensions if:

- You're browsing as a guest.
- You're using your Chromebook at work or school. If you have questions or need help, contact your administrator.

Add an extension:

1. Open the [Chrome Web Store](#).
2. In the left column, click Extensions.
3. Search for **GVL Connect**
4. When you find this extension, click Add to Chrome.
5. If you're adding an extension:
 - a. Review the types of data that the extension will be able to access.
 - b. Click Add extension.

You'll see your extensions in Chrome as buttons on the toolbar.

How extensions work:

Extensions work like regular programs for desktop computers, but they run entirely in the Chrome browser. You don't need to install software or restart your computer.

Manage apps and extensions:

- Sync your apps and extensions so you'll see them anywhere you sign in to Chrome.
- Pin apps to your shelf for easy access.
- Manage your extension settings: In Chrome, click More > More tools > Extensions.
- Uninstall an app or extension.
